

Corporate Convention Water Solutions

Every Bottle Counts.

acting sustainable and zero waste...

Our Story

Welcome to UNITED BLUERISE, where sustainability is not a concept, it's our lifestyle.

Our mission is rooted in a passionate commitment to cultivating a community of visionaries, united by the shared dream of a sustainable future. Together, we possess the power to reshape the narrative of our planet, preserving its most vital resource: **water**.

Driven by our commitment, we present inventing water solutions that empower both individuals and organizations to harness water responsibly. By improving water quality, we are also leading the way toward a future without single-use plastic.

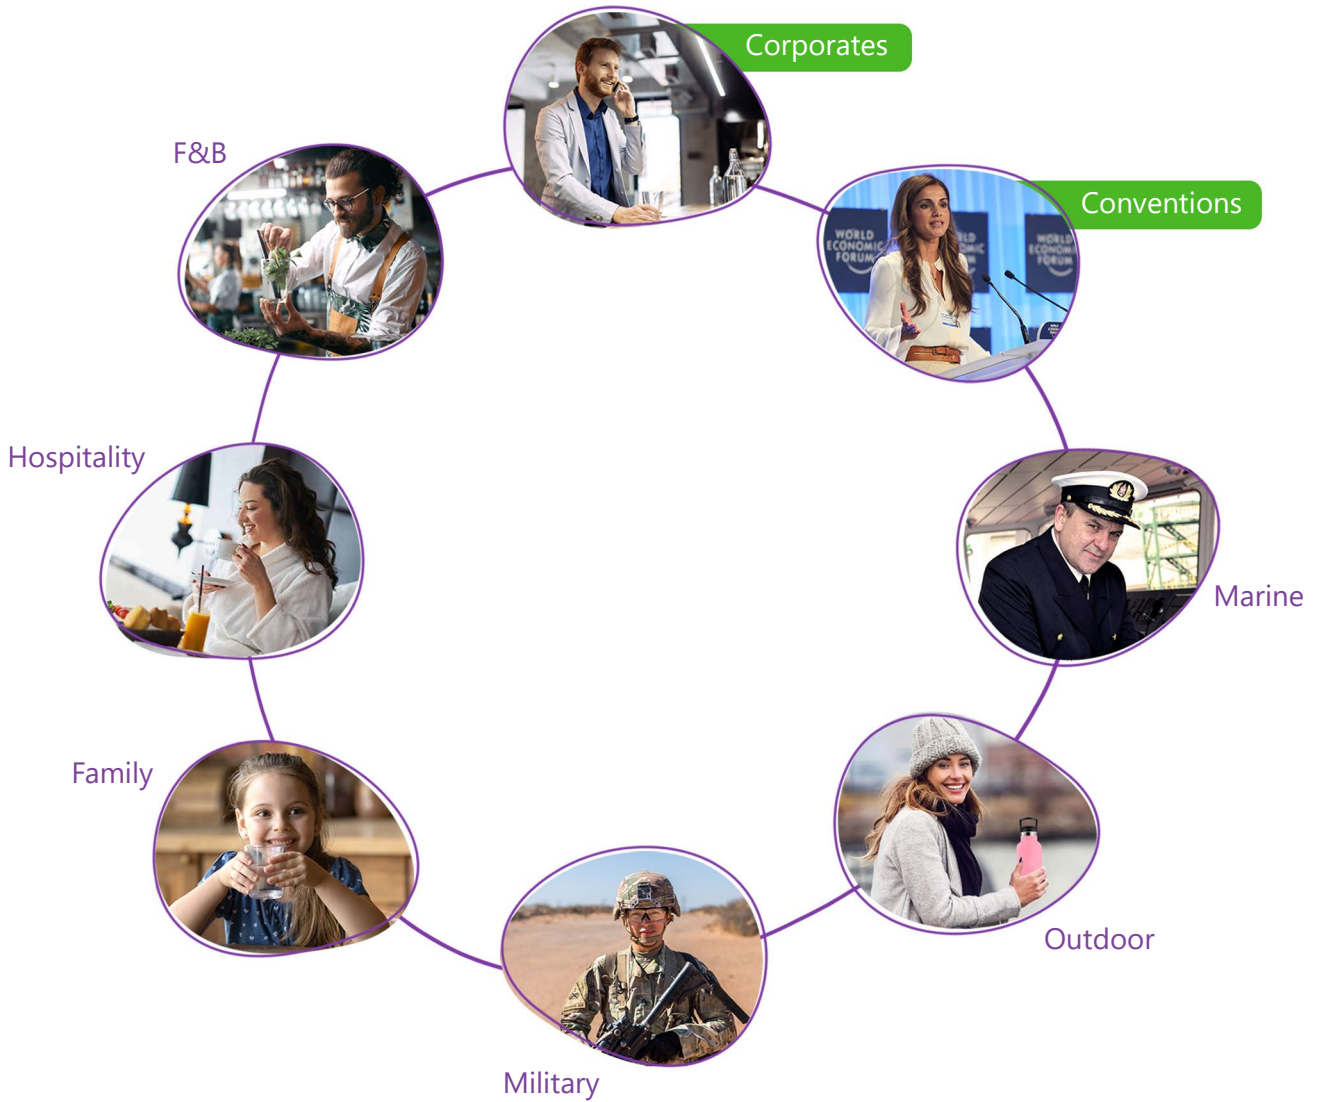

Together, we can create positive change. Join our community and let's build a sustainable legacy together!

Our Solutions

At our core, we provide a range of innovative products and solutions that not only enhance well-being but also actively contribute to a greener, cleaner planet by reducing the consumption of single-use plastics.

Our solutions are versatile, spanning a wide range of applications from household and family use to commercial ventures, as well as specialized solutions tailored for specific purposes.

Our Impact

Beyond all we do, we hold a deep sense of responsibility for the wellbeing of our planet and the generations to come. That is why we dedicate a significant portion of our resources to support global initiatives, including our partnership with the "1% for the Planet" organization.

Corporate Solutions

Implementing advanced drinking water solutions in workplace environments is a strategic move that not only promotes the health and wellbeing of employees but also aligns with the growing emphasis on sustainability. Our business solutions bring the ultimate upgrading for corporates seeking to promote the health and performance of their employees.

Introducing advanced drinking water solutions at work fosters employee health and significantly reduces single-use plastics, emphasizing our commitment to both well-being and environmental sustainability.

This dual focus on health and sustainability not only nurtures a positive work culture but also underscores a company's dedication to social and environmental responsibility, enhancing its reputation and appeal in the modern, conscientious market.

Drinking water routinely at the workplace boosts energy, improves cognition elevates productivity, and fosters a health-centric work culture for optimal performance.

Meeting Venues

Accessing water purifier in meeting areas and board rooms is essential, ensuring participants stay hydrated with desirable water, promoting focused discussions and overall wellbeing.

Guest Lounges

Serving purified water in guest lounges is paramount, ensuring guests are provided with clean and safe water, reflecting the organization's commitment to health and hospitality.

Staff & Employees

Drinking purified water throughout the day is the most vital for staff and employees, ensuring optimal hydration and wellbeing while enhancing focus and productivity at workplace.

ProAcqua - OMDE Series

Contemporary Style Built-in Water Dispenser Micro-Filtered Tempered Water with Touch Screen Glass Panel on Brushed Stainless Steel Body.

Swisspro - Clima Versa Smart

Sophisticated Touch Faucet Technology with 3 Stage Filtration System and Discrete Under-Sink Units for Preparing Hot and Cold Water Just At A Finger Touch.

ProAcqua - SLIM Line

Ultra Compact Water Dispenser with Filters and CO2 Cylinder Placed in a Compartment to be Placed on a Desk or Hung on Wall in Full Stainless Steel Body.

for less plastic ...

Our drinking water solutions fosters employee health and significantly reduces single-use plastics at work, emphasizing our commitment to both wellbeing and environmental sustainability, which not only nurturing a positive work culture but also underscoring a company's dedication to social and environmental responsibility, enhancing its reputation and appeal in the modern, conscientious market.

Conventions Solutions

At MICE hospitality, hydration time is an important portion, ensuring the vitality and wellbeing of every guest.

Beyond the fundamental role of water in hydration, it also fosters a vibrant atmosphere, promoting alertness and engagement among attendees.

Providing ample access to clean, refreshing water isn't just a courtesy; it's a commitment to the physical and mental wellbeing of every audience and a pledge to uphold environmental responsibility.

Embracing sustainable practices by reducing plastic use further accentuates overall commitment to both the environment and the event's success.

More than just satisfying thirst, this water refreshes the mind, facilitating sharper focus, connection, and the assimilation of pivotal insights. Amidst these dynamic interactions, conventions metamorphose into centers of innovation and collaboration. Every sip sparks creativity, every attendee matters, and each sustainable step makes a positive impact.

Self-Serve Solutions

Self-serve water stations at events and convention areas provide attendees with easy access to hydration, underscoring a commitment to environmental sustainability. This approach also yields substantial cost benefits for organizers.

ProAcqua Smart / City / Slimline

Suited for commercial and catering applications including public outdoor or indoor area, or high end lounge areas.

Catering Solutions

Offering water solutions guarantees consistent access to premium hydration for guests. Such provisions not only enhance the attendee experience but also showcase the host's dedication to health, well-being, and sustainable practices.

ProAcqua HRC BTI / BTIP / IN

Professional water dispensers with robust stainless steel housing and easy central dispensing point providing reliable quality water.

Finest fresh water with **ACTIVATED CARBON FILTER** and the **BACTERICIDAL UV LAMP**

Thanks to ProAcqua's innovative LED light technology with a highly germicidal power of UV-C emission, the bacteriostatic effect occurs to the wavelength of 275nm, falling within that absorbed by the DNA (in the range 200-300 nm), as the result, machine forms a barrier to 99.99% of the most frequent contaminating pathogens, including chloro-resistant pathogens, such as Giardia, Cryptosporidium and Pseudomonas. The prolonged action of the UVC light emitted by the LEDs performs a very effective microbicide action, protecting the system from bacterial retro contamination phenomena and contributes to the supply of water.

**FOR THE
PLANET.**
