

F&B Hospitality Water Solutions

Every Bottle Counts.

acting sustainable and zero waste...

Our Story

Welcome to UNITED BLUERISE, where sustainability is not a concept, it's our lifestyle.

Our mission is rooted in a passionate commitment to cultivating a community of visionaries, united by the shared dream of a sustainable future. Together, we possess the power to reshape the narrative of our planet, preserving its most vital resource: **water**.

Driven by our commitment, we present inventing water solutions that empower both individuals and organizations to harness water responsibly. By improving water quality, we are also leading the way toward a future without single-use plastic.

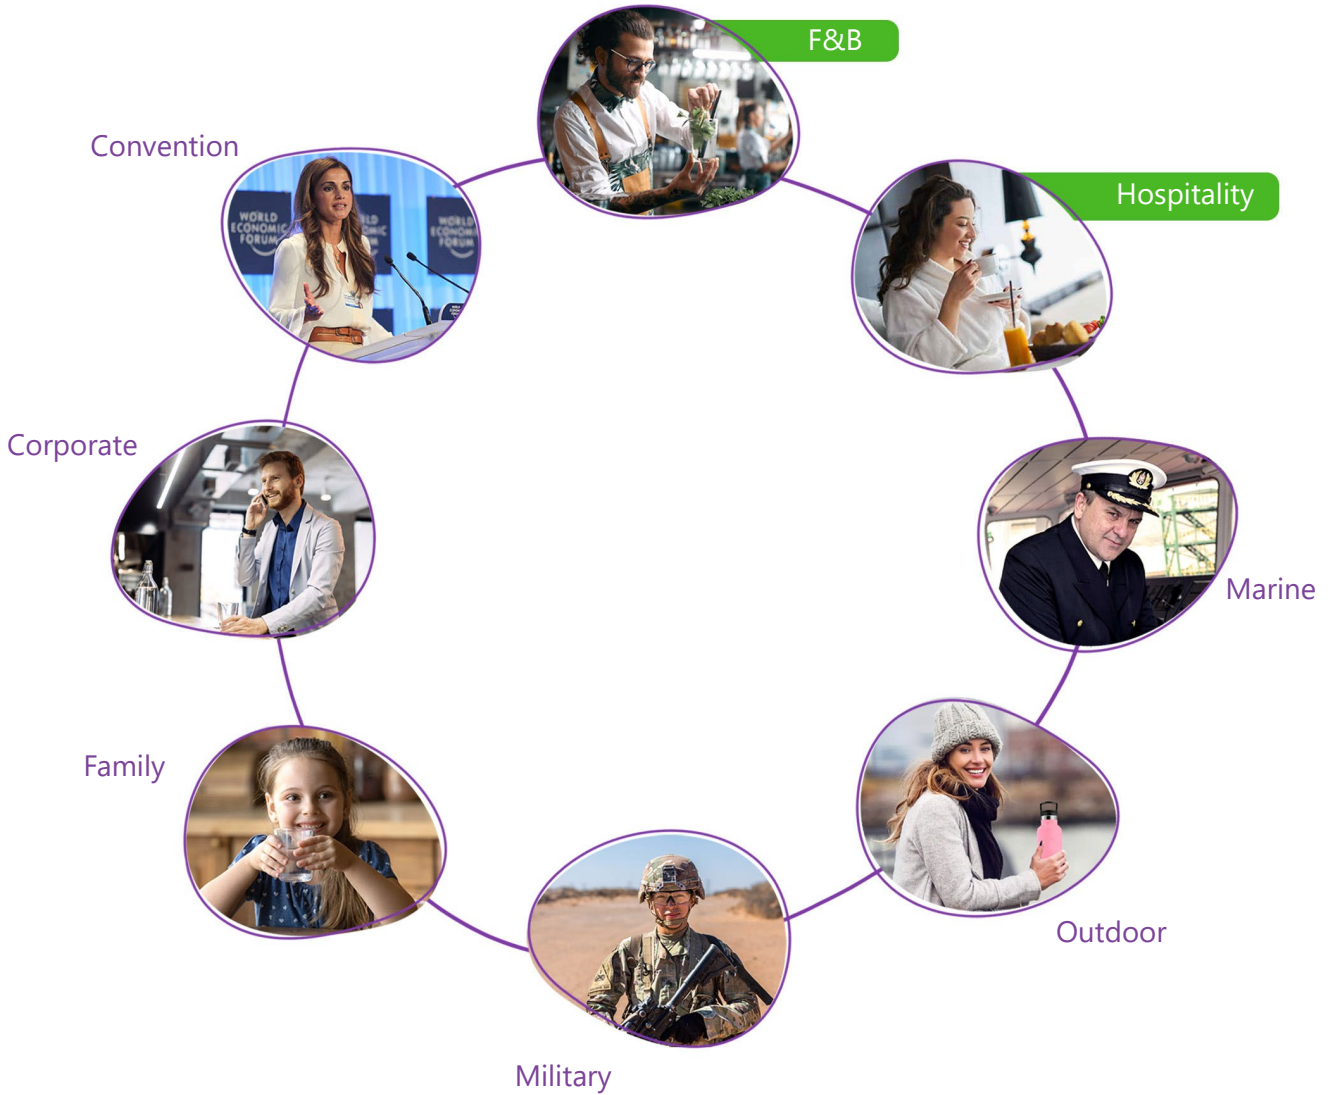

Together, we can create positive change. Join our community and let's build a sustainable legacy together!

Our Solutions

At our core, we provide a range of innovative products and solutions that not only enhance well-being but also actively contribute to a greener, cleaner planet by reducing the consumption of single-use plastics.

Our solutions are versatile, spanning a wide range of applications from household and family use to commercial ventures, as well as specialized solutions tailored for specific purposes.

Our Impact

Beyond all we do, we hold a deep sense of responsibility for the wellbeing of our planet and the generations to come. That is why we dedicate a significant portion of our resources to support global initiatives, including our partnership with the "1% for the Planet" organization.

F&B Solutions

Based on the latest industry figures, disposable cups and bottles account for over 50% of the single-use plastics in the F&B sector. By transitioning to refill solutions, businesses can make a sizable dent in plastic waste. Addressing this pressing global issue, offering filtered refill water not only exemplifies an establishment's commitment to quality but also underscores its active participation in the drive towards a plastic-free environment and genuine social responsibility.

Top-tier F&B establishments prioritize the caliber of every material they use. Filtered water is pivotal in the culinary journey of such venues, catering not just to the eco-conscious diner but also meeting the nuanced water requirements of the kitchen.

By investing in state-of-the-art water filtration systems, restaurants broadcast a lucid message: every facet of their service is designed to exceed industry norms, ensuring quality and safety. This meticulous attention to detail fosters trust and cultivates enduring loyalty among discerning patrons.

Back-of-House Solutions

In the heart of the kitchen, filtered water takes on an essential role. It guarantees consistent cooking results and authentic flavors. Moreover, it enhances the longevity and efficiency of kitchen equipment by preventing mineral buildup, making it a vital asset for chefs and culinary endeavors.

ProAcqua HRC BTIP

Professional water dispensers with robust stainless steel housing and easy central dispensing point providing reliable quality water.

Front-of-House Solutions

In the front of the house, offering filtered refill water is a profound gesture. It signifies the commitment to quality and guest wellbeing. It also underscores the venue's active participation in the plastic-free initiative, embracing a broader social responsibility, enhancing the overall guest experience.

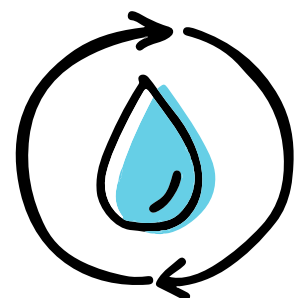

ProAcqua HRC IN

The countertop water dispenser and cooling/filtration unit to be placed under the counter together with any extra filters and CO2 cylinders.

Every bottle counts ...

Resonating truly with the UN sustainability goals, all hospitality sectors can ensure that every bottle, whether of water or in the effort against plastic waste, counts. By embracing refill alternatives, industry can dramatically reduce their plastic waste, addressing not just the pressing water scarcity but also the escalating issue of plastic pollution, and showcasing a commitment to responsible service and environmental stewardship.

Hospitality Solutions

Despite industry's notable contribution to global single-use plastic consumption in recent decades, the hospitality sector nowadays holds immense potential and influence to advocate for sustainable practices and substantially reduce plastic pollution.

Additionally, providing homely hydration is essential in guest experiences at hotel amenities. Ensuring guests are well-hydrated not only enhances their comfort but also elevates their mood, adding to a delightful stay experience.

Our innovative drinking water solutions in hospitality serve as essentials to both guest wellbeing and global sustainability, ensuring access to clean and safe water, while reducing the industry's reliance on single-use plastics and championing sustainable mindsets.

Reducing plastic usage in the hospitality industry not only fosters environmental stewardship but also yields economic benefits, leading to cost savings in procurement and waste management, and enhancing the overall reputation and appeal of businesses.

Our solutions are tailored to cater to various hospitality environments:

Lobby & Lounges

MICE & Events

Guest Rooms

F&B Amenities

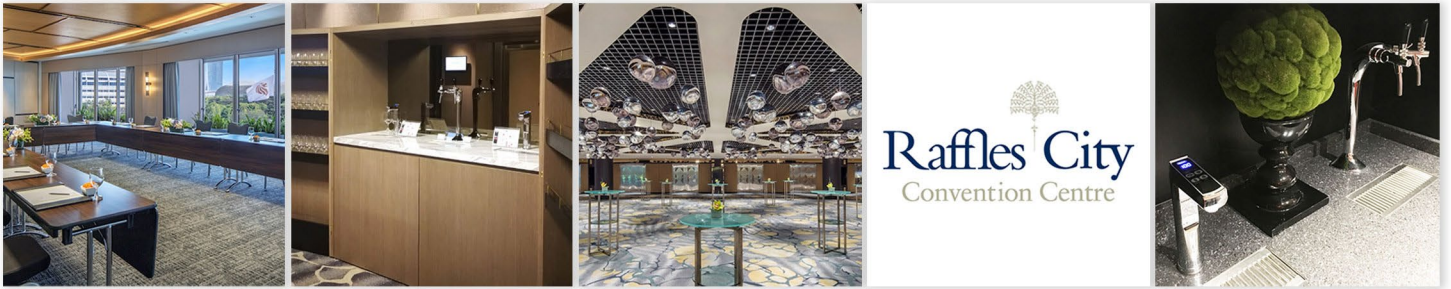

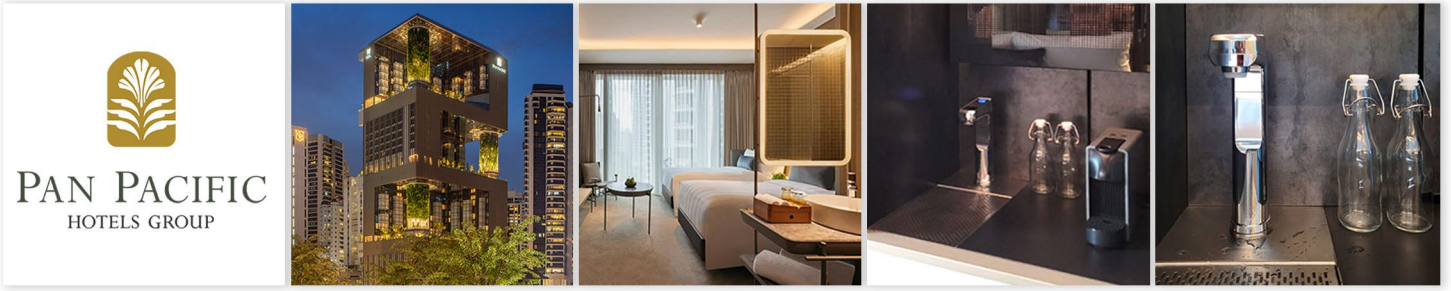

Staff & Employees

Sports & Health Clubs
